

TestApp coming soon to the APPLE, ANDROID & WINDOWS app store.

TestOp™ PREFERRED CONTRACTORS

TestOp is an online application which uses engineering analysis to monitor real-time pressure test data, detecting all possible leaks and ensuring compliance per federal regulatory requirements (49 CFR 192 & 195). TestOp offers remote access and real-time monitoring of your pressure tests. TestOp reports are generated automatically, ensuring consistent and accurate records.

The TestOp Preferred Contractors program is reserved for pipeline contractors who uphold the highest standards in pressure testing. TestOp Preferred Contractors have access to the industry leading pressure test application, TestOp, as well as exposure to the growing list of pipeline operators that utilize TestOp to certify their pressure tests.

BENEFITS

Contractors in this program enjoy tier-based marketing benefits which include:

- TestOp marketing literature
- website listing
- outreach campaigns
- marketing exhibits
- free user training
- quarterly audits and reports
- discounted pricing for RCP pressure test courses

PROVEN ACCURACY

5,000 validated tests and counting. Thanks to TestOp, our clients have been able to identify leaks which were missed by other pressure test validation models.

REMOTE ACCESS

Monitor your tests at the office, home, or in the field. Connectivity issue? TestOp has the ability to capture data offline and perform analysis once service is restored.

MULTIPLE APPLICATIONS

Use TestOp for any test objective: MAOP/MOP establishment, class change, spike test, integrity assessment, tensile test, shop test, etc. Use water, nitrogen, natural gas, or air as test medium.

COMPREHENSIVE REPORTS

Why spend hours putting a test report together? Auto-generate a comprehensive pressure test report with a click of a button. Keep all your records together by uploading drawings, test charts, calibration certificates, and other documents to TestOp.
