

UPCOMING WORKSHOPS

RCP’s DOT compliance workshops are appropriate for people who are new to pipeline regulations, who could use a refresher, or anyone who needs to know the recent changes and developments in the regulations. Courses are offered throughout the year at our dedicated training facility in Houston, and soon we will be offering Virtual online classes.

Date	Event	Location
August 31-September 2, 2021	DOT Gas & Liquid In-Person Workshop	Houston, TX
September 14-16, 2021	DOT Gas & Liquid Virtual Workshop	Online

ON-SITE COMPANY SPECIFIC TRAINING

RCP also provides on-site training for groups of five or more as well as customized company specific training ranging from half-day refresher courses to intense interaction 3-day sessions.

- On-site training is a great answer for larger groups when compared with the cost (including travel) of everyone to attend the public workshop.
- On-site training is a good team building exercise and ensures all participating employees have the same understanding of the rules and regulations that impact your operations.
- This format is great for question and answer sessions that can delve into any specific issues of concern in a non-public environment.

ABOUT OUR TRAINERS

Our trainers have a wealth of industry experience working with regulatory agencies and knowledge of DOT regulations. They provide participants with a practical perspective on their implementation at a level all can understand.

For more information or to register for a course visit us at www.rcp.com/events or contact Jessica Foley at JFoley@rcp.com or (713) 655-8080.
